

## Bulk Blaster

Designed on a fixed structure or on a trailer, they can work with up to 8 metering outlets operating simultaneously. They are made to order according to the specifications/capacities required by the customer. All machines and complete blasting equipment are supplied with the corresponding International Pressure Certificates: Directive 2014/68/EU, Module H1, Category IV; AD-2000 Merkblatter.

Racohi® Bulk Blasters are designed to maximize cost savings on high production jobs. These high production abrasive blast machines are manufactured as standard with Thompson multi-outlet instantaneous shut-off valves that allow independent abrasive flow control by each operator. Standard systems are supplied with 1700, 3400 and 4500 liter capacity pressure tanks.

Specific equipment is designed according to customer specifications.

Abrasive loading can be carried out with Big-Bag or by means of a pneumatic transport system with special coupling at the upper mouth of the equipment.

## FEATURES

- Designed to avoid downtime during the blasting process, resulting in higher productivity.
- Maximum safety design: normally closed metering valves, remote control and safety valves.
- Low maintenance, minimizes maintenance times.
- Working pressure up to 12 bar.
- Fixed structure or on mobile trolley (optional mobile chassis for highway).
- Rigid ladder for easy access for maintenance work.
- Standard with 2, 3 or 4 outlets with pneumatic or electro-pneumatic remote control system.
- Moisture separator for uniform abrasive flow.
- Thompson metering valves 1 1/2" or 1 1/4" with urethane or tungsten sleeve.
- Made to order according to specifications and capacities required by the customer.
- All machines and complete jetting equipment are supplied with the corresponding International Pressure Certificates: Directive 2014/68/EU, module H1, Category IV; AD-2000 Merkblatter.

The Surface Finishing Expert

## PRODUCT AND SERVICES

Portable blasting equipments / Nozzles and nozzle holders / Hoses and couplings / Lighting systems / Wet blasting / Dust-free Vacuumblast / Waterjetting / Abrasive vacuum recovery systems / Dust collectors / Dehumidifiers / Blast rooms / Blast cabinets / Internal pipe cleaners / Airless painting equipment / Plural component systems / Internal pipe painting / Low pressure painting equipments / Dry ice blasting / Personal protection / Measuring instruments / Abrasives
