

ABRASIVE BLASTING

Power Gun

Portable abrasive suction blasting tool used as a reliable solution for medium intensity industrial and professional applications. With moderate air consumption, it is recommended for use in those jobs where, due to their characteristics, pressure blasting equipment is not operative or exceeds the required needs. Easy maintenance, light weight and small dimensions.

POWER GUN

The suction power gun can be used for tasks similar to abrasive pressure blasting but with a slightly lower intensity. Its lighter weight and manageability make it the perfect tool for outdoor work. For example:

- Surface blasting in hard-to-reach places.
- Industrial spot jobs that do not require the installation of conventional abrasive blasting equipment.
- Cleaning coatings, rust and dirt in welding cords.
- Treatment of metal surfaces, stone and wood for restoration and other purposes.
- Valid for use with any type of abrasive depending on the surface to be treated.

Technical characteristics

- Maximum pressure: 10 bar.
- Air consumption: 3.8 m³/min (at 10 bar).
- Type of abrasive: any type of abrasive.
- Maximum abrasive size: up to 1.6 mm.
- Max. suction hose length: 5 m.
- Max. suction height: 5 m.

PRODUCT AND SERVICES

Portable blasting equipments / Nozzles and nozzle holders / Hoses and couplings / Lighting systems / Wet blasting / Dust-free Vacuumblast / Waterjetting / Abrasive vacuum recovery systems / Dust collectors / Dehumidifiers / Blast rooms / Blast cabinets / Internal pipe cleaners / Airless painting equipment / Plural component systems / Internal pipe painting / Low pressure painting equipments / Dry ice blasting / Personal protection / Measuring instruments / Abrasives
